**Rakhema Bibi's** illness cost her everything. A 35 year old mother of four, she miscarried and lost her fifth child in the seventh month of her pregnancy due to high blood pressure. When she came to The Kidney Centre for treatment, doctors ran some tests and diagnosed her with renal failure. She is now dependent on dialysis for the rest of her life.

She used to live with her husband in Mansehra, but he left her a year ago after finding out about her disease. She and her children now live with her father in Karachi, who is jobless and now bears the responsibility of looking after two unmarried daughters.

**Please donate generously to support Rakhema's treatment.** she needs dialysis thrice a week to survive.

**Pervez Ahmed's** generous offer to donate his kidney opened his eyes to his own illness. He first came to The Kidney Centre in 2003 with his sister, who was suffering from renal failure and wanted to undergo a transplant. Pervez wanted to donate his kidney to his sister, but after running tests, doctors identified that his kidneys were weak and he required treatment.

In 2010 Pervez's kidneys failed. Today, he is 39 years old, and visits TKC thrice a week for dialysis to survive. His health no longer permits him to work to support himself.

**Please donate generously to support Pervez's treatment.**

**Silveen Nisar** had no idea why her stomach hurt so badly. Her parents were very worried when Silveen, only 7 years old, doubled over in pain with a severe stomach ache and her eye and face swelling up. They rushed her to The Kidney Centre, where she was diagnosed with 'Nephrotic Syndrome.'

Silveen is a lively and spirited child – she is a position holder in the 1st grade, loves cycling with her friends in the evenings, and watching cartoons. Her parents cannot afford the cost of Silveen's ongoing treatment - therefore she is dependent on welfare.

**Please donate generously to support Silveen's treatment.**

## OVER 273 MILLION SPENT LAST YEAR ON PATIENT WELFARE

July 2016-June 2017\*

SERVICES	NO. OF PATIENTS	COST (PKR 000's)
