Four years ago, 8-year old Aaliyan was rushed into the TKC Emergency Room with a swollen stomach – he was diagnosed with Nephrotic syndrome. To this day, he still visits for treatment on a monthly basis. Aaliyan is a spirited, lively and ambitious boy – studying in Class 2, with a love for cycling and cricket, he dreams of becoming a doctor.

Aaliyan lives with his parents and four siblings in a rented house in impoverished Orangi town. His father is a factory machine operator and his mother stitches clothes at home to help make ends meet. Aaliyan needs your help – donate generously.

Life hasn’t been easy for Muhammad Danish Ali – he was diagnosed with kidney failure in 2017. It was discovered when, suffering the Chikungunya virus, a urinary tract problem and vomiting, he was rushed to the emergency room and tested. He was listed as a dialysis patient under TKC’s Welfare Support.

Danish’s family underwent hardships too – his father had a small tea shop which was demolished in an anti-en-croachment drive – the grief led to a long period of ill-health and an infection which cost him his vision. Now his mother is the sole provider of the household, caring for Danish, his father and his unmarried sister - she stitches clothes at home to make ends meet. Please donate generously to support Danish’s treatment.

Unbearable pain and vomiting brought Umer Farooq to The Kidney Centre with kidney failure in 2017. His condition prompted concerned doctors at his neighborhood hospital to send him in for a check-up, where he was receiving treatment for kidney stones.

At just 29, Umer has faced many challenges in life – he contracted polio as a child, currently undergoes dialysis thrice a week, and is the sole breadwinner for his family. On his meager salary as clerk, he supports his mother, wife, three daughters and two unmarried sisters – all living in Macchar Colony. Yet, Umer is hopeful and feels his treatment at TKC has given him a new lease on life. Help us in caring for Umer and others like him.
